"Don't let them call You SKINNY"

JUNE WILKINSON,

Co-starring in "THE CONTINENTAL TWIST"
STARRING LOUIS PRIMA

"Making any movie is hard work but 'THE CONTINENTAL TWIST' was truly exhaustingly strenuous. We started early and worked late . . . ate at all hours or not at all. To help keep from losing weight and to build up my energy and strength, I often used SUPER WATE-ON as a meal time supplement and during breaks I would eat WATE-ON Tablets, too. Both forms of WATE-ON are super-concentrated with weight building calories, vitamins, minerals, quick energy elements and other body building nutrients. Yes, WATE-ON helps maintain the figure without overeating. So, girls, don't be thin and underweight because of poor appetite or poor eating habits. Ask your doctor . . . if he approves, try WATE-ON. Perhaps the boys won't be calling 'Hey, Skinny' at you anymore."

JUST A GERM

I regret that I am not allowed to tell you my correct name. Anyway it happens to contain more than 24 letters and it a long Latin word. Because I, a little germ, happen to be concerned with a military secret, my true identity must not be allowed to become known. But permission has been given to me by Professor John Koler to call myself: "Jerry the Germ." I understand that when a female member of the human society doesn't like a male she tells him: You are a worm. And if she despises him totally she remarks: You are a germ.

Actually this is unfair to both worms and germs. For there are a lot of nice worms and germs. I was raised by my parents with a very simple philosophy of life: leave everything and everyone alone. Live your own life. And hope that the rest of the world leaves you alone. Of course I had a large family. To the best of my knowledge I had about seven trillion, eight hundred billion, thirty million, two hundred thousand, thirty five thousand and even brothers and sisters. It seems to be the general rule that germ families are large. Actually I can tell you that we belong to a species of germs not harmful to humans, animals, plants, or fish. Technically we are MODUS WOOGIE and that means we are non-toxic.

Now where do I live? But this time it probably is no longer a secret that something is happening at the bottom of a certain tropical sea. For boats flying the American flag have been there for the past five months. These are not fighting ships but peaceful ships carrying American Scientists. I learned of their prescence from my brother, Herry the Germ. I was resting peacefully on the bottom of this sea when my brother came over to me.

"There are some ships anchored right above us," he remarked.

"Doesn't that mean the people aboard will soon be fishing? We ought to warn the fish of the danger. Last year they had seven fishing boats."

"No fishing hooks or lines are being cast out from the boats," continued brother Herry the Germ. "They are throwing out little tubes and buckets. Bringing up water. Looks like a waste of time. Wonder what they are after?"

"I don't know," was my stupid reply. I should have had enough sense to figure out if they don't want fish they want something else. And that something else could mean myself and my brothers and sisters.

"I will wander around and see if I can find a clue," suggested my brother Herry the Germ.

I noticed my sister, Lerry the Germ, swimming near to me. She came closer to tell me the latest gossip. Everybody down on the bottom was talking about Sally the Shrimp. She was heartbroken. So just when my sister came up to me-it happened. One big swish-and the two of us with a lot of other brothers and sisters were going up We reached the surface of the sea and then we realized we had been scooped up in a transparent plastic bucket. No wonder we couldn't see it. I don't think it was fair to catch us that way.

"Be careful as you fill up the test tubes," said a very nice human voice. Which I soon learned belonged to Professor John Koler. "Leave a half inch air space at the top of each tube before you seal it."

About a hundred test tubes were filled with us germs and salt water. Then we were placed in a rack and taken inside to a special air conditioned room. Then I heard another scientist, whose name was Professor William Nesser speak.

"I just can't see any sense in the theory. It hasn't any connection with known facts. You can't tell me that you can take these harmless germs, place them in a test

tube with salt water, add a sugar concentrate, shake up the mixture-and produce electricity. It is almost fantastic."

"Why?" challenged Professor John Koler. "There is electricity in all living matter. Think of all the things we could do if we could figure out a commercial way to get electricity from bacteria. We could supply the power needs of entire communities at costs less than power produced by steam, hydroelectric techniques and nuclear reactors. We could recover minerals, convert solar energy to power uses, convert salt water to drinking water and generate oxygen aboard space ships. And then we could have the cheap conversion of nitrogen from the atmosphere and phosphorus from the sea into useful materials such as food and fertilizers. And we could even solve the water polution problem."

This was enough to give any bacteria a swelled head. Here I had thought how unimportant I was. You could take thirty million of us and put us on the head of an ordinary pin. That was how small we were. And now to learn that the humans wanted and needed us. If we could produce electricity for them we little bacteria would be very important. Inside of me came a feeling that I definitely wanted to cooperate. So I could generate electricity! It was a shocking feeling to know how powerful I really was.

We remained in the test tubes all night long. But I wasn't lonely. My brothers and sisters were with me. Only my sister, Lerry the Germ had a complaint to make.

"Wish the test tube was a little longer and wider. I just don't like to be confined that way."

In the morning each test tube was opened at the top and a special sugar solution dropped in. Then the test tubes were sealed again with a rubber cork. Two metal wires were inserted into the test tube. I could see that they figured we were going to make electricity right away. The wires were connected to a lamp socket.

For ten minutes a group of scientists were quiet as they waited for the lamp to glow. Suddenly one of them jumped up from his chair and shouted.

"We forgot to turn the switch."

Which shows you how absent minded a professor can be at anytime. The switch was turned to "on" but still it didn't make any difference. There wasn't the slightest flow of electricity at all. Something was wrong.

"I said it before and I say it again," began Professor William Nesser with a sneer in his voice. "I just can't see any sense in your theory. This proves it is a flat failure. Let us go back and report the truth."

Here I was a bumble little bacteria. Not amounting to much in this world. But I just couldn't stand the way that fellow was talking. And anyway my own feelings were a bit hurt. A few moments ago I was all puffed up with the feeling I had electricity in me. And now to be told it just wasn't so. Then suddenly I remembered the old Sicorian Theory: Electricity is a motion and a flow. Now I know what was wrong. We bacteria were still.

"Get moving," I shouted to all my brothers and sisters in the test tube. At the same time I made a secret signal so that the bacteria in the other test tubes would understand what I wanted. Quickly into my mind came an idea.

"Let's play tag," I added. "And don't get caught."

So all at once there was action. And when there is action you have to have reaction, which is the fifty eighty law of DynoPhysics. And then suddenly the lamp began to glow. Only feebly at first. But the quicker we went around the test tube, the more it glowed.

"The lamp is lighted," exclaimed a happy Professor John Koler.
"The theory is correct. Now what do you have to say?"

Those words were addressed to Professor William Nesser. At least I give the fellow credit. He apologized for his error and said he would be very happy to be permitted to continue with the experiment. They all left the room except the very happy Professor John Koler. He sat down in a chair and just looked at the test tube that held me really as a prisoner.

"I don't understand it," he said aloud. "It was a flat failure. Something happened beyond Science, as though the bacteria themselves knew they had to do something and did it."

"You got it, Professor," I couldn't help shouting. "This is just a bit of bacteria understanding. Believe me, I know what it is for things to go wrong. You worked on an idea and it almost didn't work out the right way. But think what the future holds for the two of us. It means a possible revolution in electricity. Such a lighting whole cities with the aid of us harmless bacteria. We are ahead of the enemy."

"Thanks a lot, Jerry the Germ," said a grateful Professor. "For that is what I shall always call you."

Just take your time and wait for the day when we light up your entire city. Maybe you won't get an electricity bill-we are working free of charge. Who knows?

LOOK SLIMMER...FEEL BETTER...

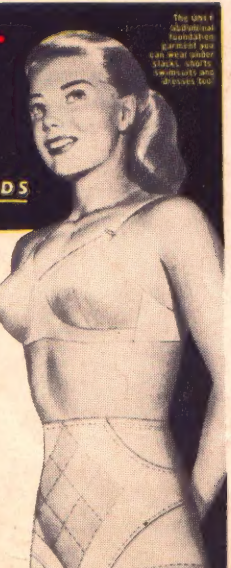
WITH AMAZING NEW

Tummy-Slim*

Featuring

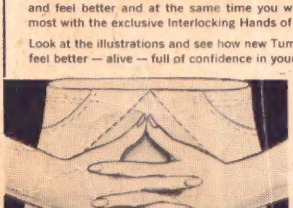
INTERLOCKING HANDS OF FIRM SUPPORT*

The Uni-F abdominal foundation garment you can wear under slacks, shorts, swimsuits and dresses too!



NOW feel yourself again instantly. Just step into Tummy-Slim, the new abdominal belt, designed especially for women who need extra flattening at the front. New Tummy-Slim flattens and gives you that strong "held-together" feeling, keeps that "falling-apart" feeling away, and holds in the extended and weakened stomach . . . improves your appearance and makes you feel lighter on your feet. You'll look and feel better and at the same time you will really be held in where you need it most with the exclusive Interlocking Hands of Firm Support* idea.

Look at the illustrations and see how new Tummy-Slim works. Magically you look and feel better — alive — full of confidence in your restored appearance.



WAISTLINE TAKEN IN STOMACH FLATTENED

Tummy Slim takes in the waist to the right proportions—makes you ready for the latest fashion creations. Your new lovelier figure is a natural for that "new look." Only Tummy-Slim does this properly, yet correctly taking in the stomach.

BACK GENTLY COMPRESSED

Tummy-Slim is wonderful for your back . . gently compresses it . . . dispels that "falling apart" feeling.

"THE INTERLOCKING HANDS OF FIRM SUPPORT"*

Look at the illustration and see for yourself how Tummy-Slim takes in the front bulge. Only Tummy-Slim has the "Interlocking Hands of Firm Support."*

*T.M. Reg. U.S. Patent Office

TEST TUMMY-SLIM THIS WAY

Clasp hands across abdomen as in the picture, then gently press up and in. Feel and look better? Of course you do! That's what Tummy-Slim will do for you.

NO LACES — NO STEEL RIBS

Tummy-Slim has no laces or steel ribs to bother you or irritate the tender skin. Tummy-Slim supplies "hold-in" power comfortably, correctly and differently.

BEFORE ←

Look at your figure in the mirror, notice the drooping abdomen — the slouched appearance, the flabby waistline.

AFTER →

Now put on Tummy-Slim and notice the difference. Stomach is flattened — waistline taken in — appearance slenderized. You look and feel better.

FREE 10 DAY HOME TRIAL:

Because we are sure you will be thrilled with Tummy-Slim we ask you to try it for 10 days before deciding to keep it. You must be 100% satisfied or return Tummy-Slim for a full refund of the purchase price
